Stalker For Mac

Both games took me about 8 hours to complete, and I have to say that I enjoyed STALKER more as I liked the open-ended, RPG/adventure gameplay and apocalyptic setting.. While FEAR's graphics are better, while STALKERS are functional but can also be impressive.. I found FEAR to be a bit boring towards the end, and quite short, while it was irritating in STALKER with the trudging about (a teleport option as in TES:Oblivion would have been good).
